

A Landbell Group Company

Part of the LANDBELL GROUP, is the leading supplier of service and consulting for global environmental and chemical compliance, PRODIGENTIA is a software company operating out of Lisbon, Portugal and specializing in Software for the Circular Economy. Our individual software solutions help businesses deliver on their circular economy promises.

Whether you are a producer of goods, a compliance scheme, a stewardship organisation, a waste operator, a producer registry or a coordination body, you are faced with the challenge of increasing compliance complexity. Our suite of digital solutions provides each participant in the circular economy loop with the tool to deliver in a simpler, secure, efficient and cost-effective manner.

We provide:

- take back transaction management, supply chain management, automatic pick-up allocation, traceability, reporting and financial management
- compliance obligation management, including report generation and customer invoicing
- financial solutions to support compliance and take-back activities

Our customer base is global. Our software is available for multiple regulations languages and currencies.
